==THE CITY OF OHM EPPISODE TWO and PARTS OF PERT ONE

Bouyes . Think deeper.

Gravity is the universe wanting company.

Bouy .

The universe is not a perfect place for humans.
Although we have the basic elements for evolution at higher levels than most beings of the animal kingdoms. These attributes being , opposable thumbs or another variety
of manipulation tool, long enough life to learn skills and the ability to make and keep records. Even with these fundamentals attached to our societies our own planet and nature can be from
brutal to extreme
and unstable
in environmental conditions
along with most parts of our charted mainstream galactic atlas In our
clustered
universe.

If trump actually cared about making someplace a great freedom place he's way off mark. He should have been at war with Mexico , central America , had cleared the islands of these slave trader populations that now run bandito island countries along with Canada. He has the right to go to war for 90 days where Congress or the senate can oppose the action. Trump has done nothing to change the obvious and fundamental problems these cavepeople have geared the USA for. Missing persons and human trafficking are on the rise with over 600,000 on record in 2023 and forced labor is becoming a common occurrence with all these tribalists and slave trader people including the Hindus who are told slavery is ok for thousands of years. Trump is not interested in eradicating slavery or mass deportation of criminals sent in deliberately as pikeys to harm freedom and replace it with a social and judicial circus of Mal adjusted performers. I have personal experience dealing with these Hindus Jews and other Indians as judges and they are always racist bigot people towards white European people like myself. And being a white European I have many instances on record. Trump is only looking to go from a blowhard Manhattan salesperson to being somewhat in control of a caveperson slavery machine. Him passing huge tax hikes on tax bills he knows will get repealed instead of changing much attainable and needed changes immediately. And you can

consider the term"going to war with Mexico" unheard in the media and just the idea is poison to the Jews and their brown south American cousins the Latinos.
On top of flying through the quantum field and not recognizing it's where dark matter and dark energy inhibit and the fluxing registering as a vacuoled space ready to accept other dark energy like gravities signature vacuoled experience. And not recognizing any of these vast mathematical concepts or what all those numbers really are as our world passes through a more stable fluxed energy grid moment to moment as clay would pass through an aluminium armature matrix and photographed cell by cell to see the actions of the clay figures animated as the aluminium matrix grid stays relatively fixed. This concept also makes more real an electric holographic universe expanding inside itself and around itself in a sense. Electrics being defined as a large collection of manipulated carriers. Which would flux the beta line of the normally beta or dormant state if no betas state exist or exists.

Was the Roman empirical state merely a means of Etruscan destruction ?
What lied pre etruscia?
Were we in the Mongolian plains before then? What of these rock piles ?
Why do they become Buddhist blessed or flag marked?

- I guess it's a flag world now.
- You can loose track of the number of flags in government buildings if you tried to keep count.

porn htgh

In review of hosted porn sites I personally have always thought of them morally and socially as somewhat to totally disgusting. I managed to watch them at times when I was younger only to immediately F10 the screen once the devil was out and contemplate what a loser I was for doing that.
I am now 20 years later in life and have not viewed porn since my early or unfortunately, on a few occasions in my mid twenties. I have decided to review a few media sites that are still as readily available today as they were twenty years ago in respect to being fair to reviews of all types of media. So I watched parts of a few and I see many of the women look as if they are on medication and most of the women were not my type and the short clips I saw mostly reminded me of seeing hairless monkeys mate. A good portion of the time I was worried about contracting something through the video thumbnails,it seemed that unsanitary and again it reminded me of hairless monkeys humping. When browsing through the Google searches I found it is now advertised for "snuff" videos in some online shops through Google. This is very illegal and you must need to be a medicated person to partake in any aspect of video sex at all if these snuff videos are becoming mainstream. The US government is now run by cave people from Russia and Canada indigenous to the monkeys of south America. The disgust I have for this neuvo riche cave women orchestrating these atrocities through our systems is immense. Do Europeans in the USA understand these round women are cave women indigenous to the Americas? , and they are white colored. And although I did not go on the sites that advertised murder and rape videos and dismemberment of your sex partner I would believe by how easily it was available on Google that you could easily use your bank card to pay for it or google wallet for security and watch women and men brutally murdered while raped on video.

WR ITING ON S CREEN

If their is a hierchy in this universe that is defined and prescribed by ones own self merit, worth of iq, and emotional capacities , then I believe truly I would certainly indeed lie vastly ahead , above and below you in perspective of the loser.

That being said, and if truth lies in the totality only or parts not mentioned inclusive and addend-able within respectable boundaries ,then why is it that women sabotage men's intellectual growth and studious dynamic thinking along with healthy emotional capacitance exercises?

The floor retracts under them as the walls and ceiling mechanicaly retract back towards the apartment the inner workings can be seen. The floor of the garage folds up and the raised portion creates ann outer wall comes up and seals the area between the apartment and the outside. They are 1800 feet above ground level floating on a pillow of Heated gasses with ionic thruster assistance. The thrusters can be seen as linear strips around the periferal of the vehicle and are stacked upon each other in the rear of the vehicle, the thrusters on either side of the split cell dirigible are for forward motion.

Jim: Yeah. He wants half.

Florian: I told him we would speak later. He wants half because your buddy James got involved.

Jim: James? The stock broker? My friend James?

JIM turns abruptly strait down as he depressurizes the air cells and heat and fire blow out of the pressure valves. Florian holds his seat slightly

Didn't I tell yaa Kristie!! they're happy to see us.

Kristie chuckles at James's amazing perception of reality, and runs up and hugs Jim and kisses Florian on the cheek.

Tito: (smiling at Jim and Florian) : Ii told you I had other interests and partners. Heres one of them I do business with from time to time.

James yells to the cocktail waitress to bring 2 more bottles of champaign.

ezoelectric Fluids and Liquid Circuitry Systems

Overview

This document details piezoelectric fluids and liquid circuitry systems, focusing on the use of mechanical and sonar agitation to activate macro, micro, and nano piezoelectric particles suspended in liquids. The report also explores the role of doping agents such as neon and phosphorus in enhancing the properties of these systems.

Fundamentals of Piezoelectric Fluids

Definition

A piezoelectric fluid is a liquid medium that contains piezoelectric particles, which generate electrical charge when subjected to mechanical stress, sound waves, or other forms of agitation.

Mechanism of Action

Mechanical Agitation: External vibrations or movement induce electrical charge within suspended piezoelectric particles.

Sonar Agitation: High-frequency sound waves excite particles, enhancing charge generation.

Electromagnetic Influence: Magnetic fields and charge distribution affect particle behavior, guiding fluidic circuitry.

Key Components

1. Piezoelectric Particles

These are embedded in a fluid to convert mechanical energy into electrical energy:

Macro-scale (1mm+): Used in larger industrial applications.

Micro-scale (1µm - 999µm): Enhances responsiveness in small-scale systems.

Nano-scale (<1µm): Increases sensitivity and efficiency for high-precision applications.

2. Doping Agents

Neon: Enhances charge conductivity within the liquid matrix.

Phosphorus: Improves energy retention and signal modulation.

Graphene Oxide: Increases electrical conductivity while maintaining fluidic properties.

Barium Titanate ($BaTiO_3$): Boosts piezoelectric efficiency at the nanoscale.

3. Liquid Medium

Dielectric Fluids: Prevents short-circuiting and enhances energy flow.

Electrolytes: Can increase ion mobility for hybrid electro-piezo systems.

Non-Newtonian Fluids: Offers adaptable viscosity for controlled circuitry.

Applications & Benefits

1. Liquid Circuitry Systems

Flexible Electronics: Fluid-based circuits that conform to dynamic surfaces.

Self-Healing Systems: Fluids can redistribute and repair conductive pathways.

Wearable Technology: Soft electronics powered by body motion.

2. Power Generation
Sonar agitation.

Mechanical / oscillators .

Magnetic stimulation.

Kinetic Energy Harvesting: Converts motion into usable electricity.

Wave-Based Power Systems: Uses ocean waves to generate energy.

3. Sensor Technology

Pressure Sensors: Detects changes in external force through fluid displacement.

Acoustic Sensors: Responds to specific frequencies for sonar applications.

Biochemical Sensors: Detects and responds to molecular interactions in medical and industrial settings.

Future Considerations

Integration with AI-driven fluid dynamics for real-time optimization.

Advanced doping techniques for enhanced charge retention and conductivity.

Scaling nano-piezoelectric fluid technology for use in quantum computing and biomedical implants.

Unlimited robotics and home electronics applications for a consumer driven world.

This document provides an expanded breakdown of piezoelectric fluid systems and their potential applications. Let me know if you need further refinements or additional insights!

# **Piezoelectric Fluids and Liquid Circuitry Systems**
Overview

Piezoelectric fluids and liquid circuitry systems are advanced power generation and signal transmission systems that utilize **macro, micro, and nano-scale piezoelectric particles** inhabiting a fluid medium. These systems leverage **mechanical and sonar agitation** to stimulate charge generation and employ **doping agents like neon phosphorus and other elements and compounds** to enhance conductivity and performance.

Key Components of the System
1. **Piezoelectric Particles**
   - Piezoelectric materials generate an electric charge when subjected to **mechanical stress or vibration**.
   - In liquid systems, these materials are dispersed at various scales (**macro, micro, and nano**) to ensure dynamic charge generation.
   - **Common Piezoelectric Materials:**
     - **Quartz (SiO_2)** – Stable, widely used in sensors.
     - **Barium Titanate ($BaTiO_3$)** – High dielectric constant, used in capacitors.
     - **Lead Zirconate Titanate (PZT)** – High piezoelectric response, common in actuators.
     - **Lithium Niobate ($LiNbO_3$)** – High-frequency applications.
     - **Polyvinylidene Fluoride (PVDF)** – Flexible, used in bio-electronic sensors.
     - **Gallium Orthophosphate ($GaPO_4$)** – High thermal stability.

2. **Liquid Medium**
   - The fluid acts as a **transport medium** for charge and enhances interaction between particles.
   - Common liquid bases include:
     - **Dielectric Fluids (Silicone oil, Transformer oil, Distilled water)**
     - **Electrolytic Solutions (Saline, Ionic liquids)**
     - **Suspension Mediums (Colloidal mixtures, Ferrofluids)**

3. **Doping Agents (Enhancing Conductivity & Emission)**
   - **Neon (Ne):** Helps stabilize charge transfer through ionization effects.
   - **Phosphorus (P):** Enhances charge trapping and luminescence.
   - **Argon & Xenon:** Used in gas-doped piezoelectric plasmas for high-efficiency charge generation.

Agitation Mechanisms
Mechanical Agitation
- **Vibration-based Excitation** – External vibrations induce **strain and charge polarization**.
- **Shear Flow Agitation** – Moving fluid shears piezo materials, increasing output.
- **Magnetically Induced Agitation** – Magnetic fields move embedded magnetic piezo particles.

Sonar (Acoustic) Agitation
- **Ultrasonic Excitation** – High-frequency waves create localized mechanical stress.
- **Resonance Induction** – Particles vibrate at resonant frequencies for higher charge yield.

Submerged Components & Housing Materials
- **Electrode Arrays:** Conductive plates inside the fluid chamber for electron collection.
- **Membranes & Barriers:** Dielectric separators for controlled charge flow.
- **Housing Materials:**
  - **Glass-Ceramic Composites:** High thermal and electrical insulation.
  - **Teflon-Coated Chambers:** Chemically resistant, reducing ion loss.
  - **Titanium & Carbon Nanotube Reinforcements:** Used for high-pressure environments.

Electron Harvesting & Circuitry Design
Lenz’s Law in Charge Induction

- **Lenz’s Law** states that **induced currents oppose the change that caused them**.
- In a piezoelectric liquid system, this means:
  - Any charge movement is **opposed by a secondary field**.
  - This can be optimized by placing **coils and counter-electrodes** around the system.

Kirchhoff’s Laws in Charge Flow
- **Kirchhoff’s Current Law (KCL)** – **Charge conservation at junctions** ensures efficient transfer.
- **Kirchhoff’s Voltage Law (KVL)** – **Voltage sums around a closed loop are zero**, helping to optimize electron pathways.

Potential Applications
1. **Energy Harvesting**
   - Power generation from **fluid movement, ocean waves, and industrial vibrations**.
   - **Wearable devices** that harness mechanical motion.
  - solar/hysteresis power generation.

2. **Advanced Sensor Systems**
   - Liquid-based **pressure, acceleration, and acoustic sensors**.
   - Piezoelectric nanofluids for **biomedical applications**.

3. **Plasma-Based Energy Transfer**
   - Ionized neon-doped piezoelectric circuits for **high-efficiency discharge applications**.

4. **Self-Powered Actuators**
   - Systems using **liquid piezo fields** for **robotic movement and soft electronics**.

Conclusion
Piezoelectric fluid-based systems offer a **unique and scalable approach to power generation and energy transfer**. By combining **agitation mechanisms, optimized housing materials, and controlled electron harvesting**, these systems have applications in **renewable energy, advanced electronics, and bioengineering**.

Next Steps
Would you like to:
- Expand on **specific calculations** for efficiency?
- Develop **simulation models** for fluid behavior?
- Explore **real-world prototype applications**?

Let me know how you’d like to refine this further!

European Entrance Problems

May 28 2025 Athens Greece

As an Italian I can say from living in both the Americas and in Europe that the only people we have problems with being Italian are the south Americans, central Americans , Canadian cave Zionists, american cave zionists posing as russians since the killed off many eal Russians during the cold war and Hindus. It just so happens those are the same groups of people that murdered our women , abduct our people and commit genocide and genetic crimes on us to blend into our society and take as many government and law enforcement positions on our lands in Europe and the Americas as possible to enforce their unevolved will upon us. Other than these jungle cavepeople and the Hindu caste system we do not have problems with anyone on the planet , just like most European and European Americans do. I grew up in new York city where Moroccan / Brazilians named the datellos insist their from Italian roots and where Hindus that crossmixed so many times like my biological cousins the pates and the covellos and the garuffalos all look like white people from the American Zionist they are from. These people have nothing to do with Europe except genocide by slipping into our lands through the east and west India trading companies after the fall of Rome with the help of cross mixed Roy's and businessmen from northern Europe. Even my ex girlfriend Jaclyn Frasier has the telly tail high eyebrows of a variety of temple monkey that evolved into one of the species of human from India, she took thinks she's Italian and french and she may be partially from genetic crimes in the past but white Europeans are not bulbous like these American cave people called Zionists. I personally refer to them as "The Utah Humps" because of their "hills have eyes" locale of

origin in the Utah canyons and their bulbous Humps that show more the older they get. I also was corralled by other varieties of Humps growing up a family named the mansuetos are Canadian Humps indigenous to Canada , they are larger and more bulbous than the Utah Humps and a smaller indigenous white person from the Barbary coast I have not made a nickname for due to them doing nothing to harm me or my people and somewhat living in synergy with other people. My biological sister as well is a Utah hump with meaty back fat and shoulder Humps much like Ivanka trump before she started starving herself to look more euro. These russi Canadian pigs so much harm to us in Europe and the USA and many of them can be seen in photos of the female SS and as female holocaust guards outside of Germany during ww2 where most of the horrific events took place. Most of the holocaust sites in Germany and France had most of the murders committed by the Americans the night before they officially showed up with "supreme commander Dwight d Eisenhower" who claimed to be German but In stills from videos looks very much African and American cave Zionist mixed together. In the cia approved official photos of him the angles and expressions do not look African or Zionist but looks more European, until he grew older then his African genetics started to show more. Look for yourself , stop the footage of him in random places and see for yourself.

Nederalnders with the upturned noses are a race of orangutan (like trump ad his orange hairs) , the same species of humanoid as many of the Hindus and people like Modi. These white pigmented Hindus have been torturing Europeans in the Netherlands , trading slaves from Africa and sending out war parties to kill of white Europeans in Greenland , Iceland and Canada since the fall of Rome. Many of them are crossmixed and are more European than others but the ones in politics like Donald J Trump do mass harm to people in modern times unlike his cousins in Holland and Flanders currently do , if they even know they are from the orangutan is debatable as well. Were told over and over we are all from chimps and that's not true. We are from many species of primate , monkey , simian and mammals all evolving into humanoid at various times throughout the earths lifespan since it's conception billions of years ago.. out of the hundreds of species and races of these mammals on earth can you spit the ones your comprised of ?

Just hours after writing the above passage I reentered Eurpoe. When I exited into Turkey last week I was harrassed by a Hindi mixwd with american cave person at the border. The female gimp looked a lot like my hindu american cave cousin Dr denise pate of New York City whos cave father John Robert Pate was a Colombo crime family member before he turned states evidence for the American Cave people in the Federal government and helped destroy our communities further with these russian canadian cavepeole and south american cave people poseing as european americans, who are the same peole featured in photos of the Holocaust that escaped capture to South America. Upon My return to Europe and Thessakinniki I entered through the Greek Entrance and was again harrased by two latinos working the Border. One American Cave person from Brazil (the Ball shaped people) and the other was your typical Jew spick taller thinner and found through Geneva switzerland instead of swiss and french people being there. Both my exit and my entrance I was harrassed by these American Zionists from the SS , female SS and male and female holocaust concentration camp people. Thiese people were not working the Turkish sides , These people are placed there by the cartels to allow human trafficers and drugs through into and out of Europe for the cartels , the Hindi caste system and other tribalists who abduct , rape , murder and make snuff videos of our white european people. The obvious corruption in these borders is insulting , these jews need to be stopped, besides the war they committ on everyone now that tese cavepeople with european or african or asian genetics mixed into them committ horendous and also insulting to anyone that truly understands how terrrible these people are. As I look through these attrocities that happened to the germans Italians , french , spanish and british I can only have deeper and deeper hatred for these people. They need to be nuked in India , South maerica , Central America and Canada to begin with , however with so many of them cross bred and now in our EU and USA governments and federal departments it seems as if our white european species is going to be killed off less the attractive ones these beasts from the cavesystems want fo rgenetics or to rape as sex slaves and the like. These are cave people that shave , wear clothing and can drive cars, its absolutely ridculous having them alive and in our governemnt , military and law enforcement systems. These people need to go back to the barzilan cave systems , the canadian cave systems and bellarus where these fat fuck pigs are all over. This is extreme genocide by these lowives.

Coffee Culture

may 25 2025 istanbul

Istanbul turkey . Besides being home to some of the nicer people on earth, the city has one of the greatest coffee

cultures in the world I've traveled. The streets are constantly bustling with industrialist , commercialists , artists , musicians and culinary kings and queens. Being a very low income person myself I do not always have the capability to stay in the fancier parts of cities I travel through and often I find myself asking shop owners and passerby's for food , money or a train ticket somewhere else in my search for asylum from the USA government, so i see sides to places most do not.

I recently viewed a news story about an attack in Istanbul on American government employees working in the armed forces. I saw the footage online and noticed not one person in the assailing party was actually Turkish , but in fact origin from other parts of the world.

I personally have been sleeping in the streets for over 15 years from constant financial fraud and other crimes by the ugoslavian Colombo crime family operating in new York city , Miami and los angles along with the agents in the FBI s witness protection program that protect them and steal inventions and innovations from me with these lowlife cavepeople. I personally think most of the American armed forces needs to be dissolved especially the special forces drug dealing snuff video making department, in my and others urine, so I was not worried about coming into these parts of the world so much understanding a little more than most people do. Although being a German Italian I was born in America and I most likely will not go east of Ankara.

Besides the delicious foods, fragrant tea shops along with the culinary spices and delicious breads and pastries, magnificent glass works, tapestries and garments, the city has one of the largest coffee cultures I've experienced in my 15 years of traveling to get away from these organized crime groups and American government that constantly steal innovations from me ranging from aeronautics, weapons designs, energy manufacturing , piezoelectric fluid circuitry systems , medical devices, safety devices for electric vehicles, advanced magnetic arrays and system, and a host of over 300 other inventions the Russians from mar a Lago and the eastern European Colombo crime family (a support group for the russian KGB) as well as the USA Zionist government [all Jews] constantly steal through my online drives , my laptops , cellphones and my website I once used as a file directory for innovations and timestamps on my work Nd writings. It is very difficult to lug around these works if the are on paper. I would need to tow file cabinets that would fill an office around with me by now.

The coffees range from arabica to African to Carribbean and they even have south American uncultivated hightest shit if you prefer. With 16 million residents and a constant flow of tourism year round this has become "the city that never sleeps" while most new Yorkers are high on diazopam or lithium and sleeping or catatonic from having to pay ridiculous prices so any caste system tribalist groups that hate Americans can live in a developed nation way ahead of their people's developmental state and what they developed with their own circumstances and thinking. The city of Istanbul is non stop and very exciting. I would recommend it highly to travelers and vacationers on their next trip to club Mediterranean. I would also recommend studying Turkish first although most people here speak a few languages , it's still very nice to show respect for places you may travel to and not insist you and your region are the center of the world.

I also think the entire US government when on shore leave or sitting at their desks in America should enjoy daily a nice big cup of "shut the fuck up".

European Security Measures

may 24 2025 istanbul

It is a very sad truth that in Europe the new so called Europeans that are in Europe due to many forms of genocide on European people and now control much of the system they murder us in. These American indigenous cave people and their Latinos from the Americas and indies have now taken all of our resources and use European security measures against Europeans who visit their homelands or try to reintegrate into our homelands in Europe. These people are the cause of the Danzig slaughters where 10s of thousands of Germans (Roman descendants Germanic desendants) were raped , mutilated and murdered just before Germany invaded Poland and while Churchill the American caveperson was bombing other civilians in Germany through air raids for over three months. These are also many of the women in the female SS and female concentration camp guards from the holocaust of world war two much like mi biological sister and many of the Russians from Staten island who claim to be Germans or Irish or Italians but are found in no old paintings anywhere or depictions in stone or on pottery. I can not find them in russian paintings either they are most likely whitish pigmented people from Zion Utah , Canada ,south and central Americas. If new paintings show up with their faces I would be almost certain they are newly drawn on after stalking my research and writings for over a decade of investigating them and notating these facts.

Market Crash

may 24 2025 Istanbul

I wonder how a small mercantile exchange in New York City in the 1920s brought a massive country with every resource virtually untapped to its knees financially? Is it possible this is more propoganda by the Caste system elitists globally and the monarchies which need tax payer dollars to stay ahead in a business world. Before WW2 plumbing company owners made more money than most royalties around the world. Since WW2 and prior to that the mercantile crash of the 1920s inflation has caused our dollar to be worth less and less globally than any currency on earth save a few. Do you realize since the year 1980 that the cost of everything in the USA has ten times'd itself on average, Thats 1000% inflation in just over 40 years conservatively. Where do the profits from over 1 million square miles of bread bowl in the USA go? Where was the money from that was pulled out of the mercantile exchange in NYC to cause the crash? What families Globally were responsible for this abuse of american citizens in the only freedom country on earth at the time? Why were these families not arrested or killed? Who are their predecessors and relatives? Was it the royalty bankers like the rothschilds family and the like who slipped into Switzerland after the French Indian royalties killed off many european families in switzerland starting in the war of 1792? What has France , Britian and the Netherlands been doing in all these foreign lands since the fall of Rome? Could it be the Zionist caveperson Churchill denying India free grains instead of them digging into their Depositories to pay for food that turned the people of India onto the Bread Bowl in the USA and helped cause many deaths of freedom fighters in WW2 , Korea and Vietnam where European Americans were sent to their deaths over and over clearing the way for outsiders to

move into the USA through thousands and thousands of miles of unprotected northern and southern borders. Who are all these ball shaped women in the USA now, they are not in any old paintings in europe , they are not depicted on pottery or sculptures from ancient etruscia , Rome or greece? In fact who is this modern greek population, Greeks are white people not hindus or indies, Italians are white people, sicilianns and spanish have blonde, red and brown hair not strait black hair. who are all these indies and how are they in all our homelands? I have been a victim of persecution for decades from the afro indie caste system and the european royalties committing crime after crime on me including a kihadist attack against me in Paris france on feb 22 2022 that is on record but covered up by the french afro indie zionist caveperson police called ulyssies, the FBI , Judge aileen cannon of the miami federal courts who was born in cali columbia and has ties to the cali kartel and whom herself is a hindu mixed with these zionists cavepeople from south america(white pigmented cavepeople with big jawls) and judge reisenhart of the miami federal courts. These people are not supposed to be in freedom countries, they are caste system which are freedoms direct and ongoing enemies. The last mafia we had for white people was called the IRA, most of these modern day groups that call themselves "mafia" are in fact organized crime employed through various channels by foreign elitists. The Mafia protects its own people , these modern day O.C. groups commit crimes on the people. The USA was formed by the real mafia which included men and women such as George washington, Thomas Jefferson, Benjamin Frankilin, Nathan Hale , The Minute Men and hundreds of thousands of other members fighting the royalties off and their henchmen such as the Masonic society who are brick and mortar organized crime members employed by elitists. Most americnas do not understand this, they do not understand that the Gmen are enemies of such people as George Washington and the minute men. They do not understand that people like Truman and these american elitist cavepeople were and are enemies of freedom and although they are white pigmented they are anti Europeans and highly racist with all their cross bred white skinned mutants in American and european politics. After WW2 the war assets administration and the war surplus board immediately sold of over 170 government owned airports , the steel industry and many patents to India and other caste system elitist countriesas our mines were being shut down systematically in the USA, getting worse decade by decade. One more thing, after 500 years or so af americans mining and saving money where are all our treasuries, we have only 200 billion dollars worth of gold in all of them which is enough money to run the country for about 2 weeks. While the Americans thinkits great to go on vacation and pay resonable or slightly inflated prices on foods and hotels even in the more expensive tourist regions for these outside countries they do not realize that their is absolutley no reason for their own prices to be so high. You make ten times more money than a second world employee but at the end of the month theirs still nothing left after the 1000% inflation in the past 40 years or so, and if you add medical your paying maybe 50 times more for the same products and services as everyone else on earth. Do we have to walk the ICBMs into canada and Mexico or can we get rid of this current "know like and trust " corrupt car sales man called The DONAlD who inherited 100 million dollars from his daddy

in credit and assets and money and now with inflation before his first term was only worth 3 Billion dollars, which means with inflation he lost 2/3 of his family fortune and would have more money if he invested strictly in ten year interest bearing notes. Now after 80 years and losing 2/3s of his inheritance inflation values included he somhow has 8 billion dollars which is what his daddy left him before inflation. He also committted the largest tax increase in the history of the world after telling the world the USA would only stop Russian bombs from killing Ukranians if he and his group of faggots get the minerals and gems from their land and prior to that threatened Denmark to go to war with Europe if Greenland was not sold to the USA for a worthless 2 trillion unbacked US dollars, Greenland is twice the size of the continental usa and is worth upwards of 2000 trillion euros with all its untapped resources, And you Americans cheer this retarded skin sack and his mail order wife. Good luck to you morons. oh and if you check out the rent increases in the 1980s in newspaper classified archives you can see when Americans were priced out f NYC and other major cities through the USA.

"Interact Me"

Over the past 8 months ive had this story deleted from this page multiple times. I now write it again. It pertains to a new style of presidency of the USA that the citizens of america and the world can trust a little. Since I first wrote of this system the car salesman Donald J Trump has used some of the methods of my political party again but has still refused to arrest the people responsible for stealing hundreds of inventions from me and has instead been illegally stealing from me as well for over twenty years of me reporting them and other members of mar a Lago for serious crimes committed on myself, an ex member of Mar A Lago , whom they all know personally.

The system of presidency and governence utilizes non stop camera and audio on all political figures every working hour of the day 365 days a year. The website i designed has the viewing audience (American citizens) for the first time in American history having control over their own country. This system also utilizes AI to assist the politicians in taking questions and comments from the viewing audience of Americans. It allows for meeting coverage , telephone call coverage and tails the politicians throughout the workday , non stop. The system also includes taking questions and arguments from citizens and offering multiple choices for the audience to deliver the most relevent and pertinent questions directly to the Oval office , Senators offices and every state politician in the USA. The website allows for the viewer to pull up window containing any politician they want to watch. It allows for chat room discussions to finalize questions and arguments to present to politicians before they put their/our signature on whatever law , bill , ammendment, court statute and the like on city , state and federal levels. The system also is designed for the population to count every vote that is cast by the people through serial numbers and verify that all votes are counted correctly and singularly, instead of whatever companies such as Dominion in Venezuela do with hour votes. (Dominion is where the USAs votes are sent, the company advertises the capability of the

program to change vote lots however the opperator sees fit, and is centralized in Venezuela with the cocaine farms and caste system cavepeople) . The system also incorporates through what is already stated the ability to make sure our politicians are actually at work instead of golfing or blowing little boys in costa rica through the forced labor sex trade. It ensures that the Consulates will not be making deals with foreign royalties while they should actually be back in their cave systems in Canada and Russia with the Trump family where they belong.

On top of flying through the quantum field and not recognizing it's where dark matter and dark energy inhibit and the fluxing registering as a vacuoled space ready to accept other dark energy like gravities signature vacuoled experience. And not recognizing any of these vast mathematical concepts or what all those numbers really are as our world passes through a more stable fluxed energy grid moment to moment as clay would pass through an aluminium armature matrix and photographed cell by cell to see the actions of the clay figures animated as the aluminium matrix grid stays relatively fixed. This concept also makes more real an electric holographic universe expanding inside itself and around itself in a sense. Electrics being defined as a large collection of manipulated carriers. Which would flux the beta line of the normally beta or dormant state if no betas state exist or exists.

Destruction of holy stones holy mountains holylands

Do you know that baer aspirin is made with puro Bianco grade Italian marble from Carrara Italy. Right next to the quarries that the Romans and Europeans and international artisans and artists have been carving since before time was a thought. These holy mountains in our homelands have been totally desecrated by the Jew Zionists indigenous to the Americas and where countless SS fled back to after ww2 . These desecrations continue in all fashions of our homeland and holy lands being Europe and now filled with intermixed foreigners determined to undermine all our systems and committ more holocaust and genocide on Europeans and European Americans. Due to our more evolved emotional capacities from more experience as humans who evolved on this planet from a variety of alternate monkeys, simmians gorilla, apes,and other mamals finding the path of least resistance in this planet in this quadrant of this universe where the pars or claws evolved with the

commonalities if 5 through many varieties of life carbon based. Also sending to be part of this evolutionary system of following the paths of least resistance seems to be two legs and two arms with these smaller protuberances being called feet , hands, fingers and toes. That being thought about makes it more understandable when studying animal behaviours and tracing them pre monkey to determine where your origin of species lies within and understand on a more technical level how your mammal virus body developed on this planet and from what mammal and precedent mammal or other life you evolved from. The idea of god would be untouched in this spectrum of ideas indicated here and being gods universe is most likely no shock to god. Although on a superficial level the churches , mosques, and synagogues have nice teachings on history and lessons of life and treatment of others the sad truth exists that region although elusive is very real factor in today's modern society, and if the different species of humans should cross breed and mix brain parts with different genetic codes coming together. It seems as if in places such as the USA where every foreigner has had their way with the European Americans that once made that country really great. What happened was after the 70 million people killed in ww2 and the millions killed in ww1 we then faced as white people from Europe being forced to fight in wars like Vietnam and Korea which destroyed Americas steel and mineral resourcing counties across the USA the past 60 years shutting down local hubs so the resources can be undermined later by these same white cave people from south America over and over. They have been coming into Europe for hundreds of years and are noted even as bodysnatchers from the north Ireland history where these white round people would kidnap women and children from north Ireland? Could these be linked to the Indian parties the Dutch would send out to kill north Atlantic rim settlers in the Americas. Why has Canada and french Canada covered these settlements up ?

So with all those families not existing any longer and the systematic genocide on many varieties of white European people in replacing them with foreigners mostly if Hindian or south American origins. I've spoken to a bunch of them and they preach that the universe is hell and they should govern hell. I get into some strange situations , I know. But anyhow
, how much balls does it take to think you can tame hell?
And it's not hell,
But ,
This is the shit they preach.
Even if these hell worlds do exist like the hadean planets we find ,
And it proves to be a galactic prison system for offenders to be auto mastic handled by machinery . It could prove that the bible and other religious texts come from real happenings but translated for people who did not invent a cigarette lighter yet in their society.
So the teachings may be different than what our species could understand mainstream at the time.

Jupiter, the God of Gods

"Upon the throne of endless might,
Where lightning's spark ignites the night,
Jupiter, the ruler grand,
Holds the heavens in his hand.

With eyes that pierce through time and space,
He reigns above the regal grace,
His thunder roars, the skies obey,
The king of gods, the light of day.

Beneath his gaze, the world aligns,
In harmony, his power shines,
A symbol of eternal reign,
In tempest's heart, in sun's bright gain.

From lofty heights, he guards the skies,
With wisdom vast, with watchful eyes,
Jupiter, the god of gods,
The universe his grand applause
